

Restriction of Hazardous Substances (RoHS) statement on Bel-Ray products

The European **Restriction of Hazardous Substances Directive** 2002/95/EC **(RoHS 1)**, **RoHS 2** Directive 2011/65/EU and Directive 2015/863 restricts the use of ten (10) hazardous materials in the manufacture of various types of electronic and electrical equipment. Some Bel-Ray lubricant products are used to lubricate electronic and electrical equipment. Bel-Ray doesn't use those ten chemicals in the formulations. All Bel-Ray products contain none or less than detectable of those ten materials.
